

# SCHWING *Select*

Certified Pre-Owned

Leading Technology. Leading Performance. Leading Reliability. These are the core attributes that define the Schwing name and make it the concrete pump of choice for successful contractors and concrete pumpers. Now these same qualities are available in certified, pre-owned concrete pumps — **Schwing Select**. A unit qualifies for the program after a thorough review of its service history, a rigorous inspection, reconditioning and a certification process that may include retrucking. This creates a concrete pump ideal for customers who want

to maintain the reliability and performance of their fleet while upgrading to a longer boom. First time buyers will discover the legendary after sale support, highest return on investment and significant cost savings that come with the Schwing brand of concrete pumps. And nothing is left to chance with Schwing Select's better-than-new warranty.

Don't just invest in a concrete pump, invest in your future with a company that has stood the test of time...Schwing.

Why buy a lesser brand when **SCHWING Select** offers greater value?

**SCHWING Select**  
Certified Pre-Owned

## WORLD CLASS PUMPS WITH WORLD CLASS WARRANTIES: THREE YEARS OR 3,000 HOURS

The **Schwing Select** warranty of 3-years or 3,000 hours\* of operation is the industry's best and speaks to the superior design of our concrete pumps and the care we take in choosing these units. Our attention to detail during inspection even allows us to include Rock Valve and boom wear parts in this warranty for bumper-

to-bumper confidence. Best of all your Select warranty is backed by a company with more than 75 years of servicing what we sell.

Select owners enjoy the fundamental features of a Schwing that provide cost and time savings over the life of the pump:

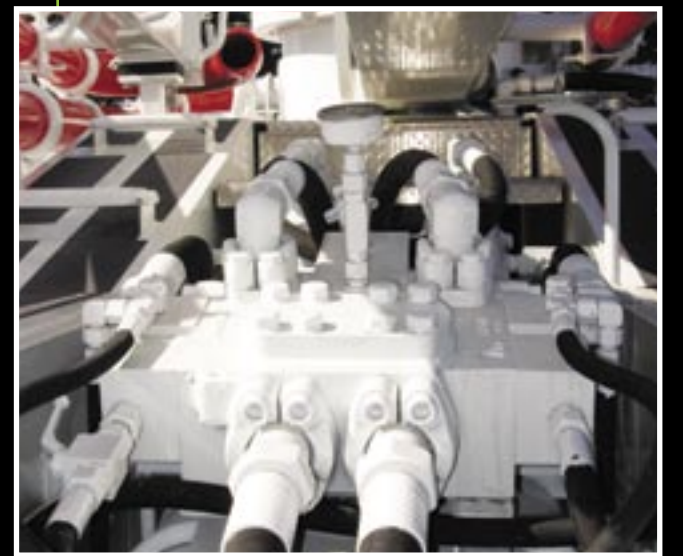

### ROCK VALVE™

The ability to pump the harshest mixes and provide the fastest cleanup with less water have made the Rock Valve the first choice for successful owners. Excellent accessibility to this important component for maintenance and the ease of rebuilding the Rock Valve results in the lowest operating costs per yard for continuous savings over the life of the pump.

### PUMP KIT

The open loop Schwing design sets the standard for reliability and performance with application specific components to maximize efficiency to provide the most fuel efficient pumps in the industry. All-hydraulic operation combines with the longest stroking pumping cylinders in the industry for a smooth, continuous flow of concrete which also translates to longer boom life.

\*See Schwing representative for details. Three years 3,000 hours applies to concrete pump and boom. Truck warranty is 3 months on existing chassis or OEM warranty for new trucks.

# Nothing is left to chance with **Schwing Select's** inspection, reconditioning program and warranty.

## HOPPER REPAIR

- New Wear Insert
- New Cutting Ring

- Ship Away Kit Same as a New Pump Per Schwing Price Book.
- Documents Same as New Pump – One Full Set Of Manuals With Second Copy On Disc.

# ONLY ONE MANUFACTURER CAN SUPPLY THE SCHWING EXPERIENCE

Access to the Schwing experience is as easy as dialing 1-888-SCHWING. You will be welcomed at our Call Center by an experienced staff that consults with customers and practices a team approach to case based problem solving for total customer satisfaction. With access to electronic pump files, schematic and final assembly drawings and the Schwing engineering staff, service issues are quickly diagnosed and solutions communicated by phone, e-mail or fax. These same resources identify the correct replacement part that can be shipped 24/7 in order to maintain your Schwing pump. Call Center employees embrace a sense of ownership in customer problems and strive to achieve timely resolution through clear communication. With so many tools at their disposal and a wealth of hands-on experience, Call Center staffers can often provide parts installation tips to mechanics or guide an operator through a component adjustment to finish the pour and get on to the next job.

One of the most valuable aspects of the Schwing experience is comprehensive service training available at our factory or customer locations. Thousands of operators and mechanics have taken advantage of three levels of service seminars to extract the maximum profitability and uptime from their Schwing equipment. Details are available at [www.schwing.com](http://www.schwing.com).

Generations of successful owners have chosen the Schwing experience. As a third generation family-owned company we understand how important quality equipment is to your business and how important your business is to us.
